Capital Development Plan Project Justification Report  
Biodesign C**

**Previous Board Action:**

---

**EXECUTIVE SUMMARY**

**EXECUTIVE SUMMARY****Project Status and Schedule**

This project is in the design phase, with construction scheduled to begin when all approvals are in place. Construction will be completed approximately 21 months after CMAR construction contracts are awarded.

**Project Cost**

The budget for this 193,000 gross-square-foot project is \$120 million. Completion of the programming effort resulted in the addition of one floor and a basement, totaling 42,000 gross square feet and a \$10 million budget increase, since receiving CIP approval in September 2015.

The budget represents an estimated construction cost of \$498 per gross square foot. The estimated total project cost is \$622 per gross square foot. The following table presents projects considered comparable to the Biodesign C project, with costs adjusted to reflect today's dollars:

Comparable Project	Location	Project Size/GSF	Year Completed	Escalated Const. Cost / SF
Silverman Hall	Northwestern University	149,531	Sep-08	\$509
UCSD BioMed 2	University of California, San Diego	195,975	Jan-11	\$593
<b>Average Comparable Project</b>		<b>172,753</b>		<b>\$551</b>

Considering these relevant comparable construction costs, the Biodesign C budget of \$498 per gross square foot is considered reasonable.

For this Capital Development Plan phase, DP and CMAR teams have provided external cost estimates from independent programming efforts. Independent cost estimates will continue to be provided by the DP and CMAR as the project progresses through the design process.

The CMAR will be at risk to provide the completed project within the agreed-upon Guaranteed Maximum Price (GMP). A final report on project control procedures, such as change orders and contingency use, will be provided at project completion.

**Fiscal Impact and Financing Plan:**

The \$120.0 million project budget will be funded with system revenue bonds. Debt service will be paid from indirect cost recovery and tuition.

**Debt Ratio Impact:** The projected incremental debt ratio impact for this project is 0.36 percent.

**Occupancy Plan**

The building is designed to provide research space only and will be utilized by researchers from College of Liberal Arts and Sciences, Ira A. Fulton Schools of Engineering and the Biodesign Institute.

Operations and maintenance costs for this project are estimated at \$2,795,929 annually. The University will fund operations and maintenance through indirect cost recovery and other local funds.

**EXECUTIVE SUMMARY****Capital Project Information Summary****University:** Arizona State University**Project Name:** Biodesign C**Project Description and Location:**

Biodesign C, located east of Biodesign B on the Tempe campus, will strengthen ASU's position as a global center for interdisciplinary research and development. The five-story plus basement, approximately 193,000 gross square foot facility will include laboratories, lab casework and office layouts that will be modularized to allow for maximum flexibility, adaptability, planning and expansion based on research and user needs. The modular layout also will allow for reconfiguration of new research space with minimal required demolition of built systems when new research projects are brought into Biodesign C.

**Project Schedule:**

Planning	July	2015
Design	October	2015
Construction Start	April	2016
Construction Completion	March	2018

**Project Budget:**

Total Project Cost	\$ 120,000,000
Total Project Construction Cost	\$ 96,000,000
Total Project Cost per GSF	\$ 622
Construction Cost per GSF	\$ 498

EXECUTIVE SUMMARY

**Arizona Board of Regents  
Arizona State University  
Capital Development Plan Project Justification Report  
Gammage Auditorium Rehabilitation**

**Previous Board Action:**

FY 2017 Capital Improvement Plan

September 2015

**EXECUTIVE SUMMARY**

This project will support this ABOR 2020 Vision goal and the ASU Design Principle of enhancing and improving local impact and social embeddedness.

**Project Delivery Method and Process:**

This project will be delivered through the Construction Manager at Risk (CMAR) delivery method. This approach was selected to provide contractor design input and coordination throughout the project, alleviate potentially adversarial project environments, and allow for the selection of the most qualified contractor team. With the use of two independent cost estimates at each phase, and pre-qualified, low-bid subcontractor work for the actual construction, CMAR project delivery also provides a high level of cost and quality control.

ASU selected Core Construction as the CMAR and RSP Architects as the design professionals for this project. During the selection process for the CMAR, there were 16 responses and 5 contractors interviewed. The selection process for the design professional included 22 responses and 5 firms were interviewed.

**Project Status and Schedule**

This project is in the design phase, with construction scheduled to begin when all approvals are in place. Construction will be completed approximately 11 months after CMAR construction contracts are awarded.

**Project Cost**

The budget for this 10,000 gross-square-foot project is \$9 million.

The budget represents an estimated construction cost of \$702 per gross square foot. The estimated total project cost is \$900 per gross square foot. The resultant project budget reflects the unique nature of the project and that this is a National Register of Historic Places-listed historic building designed by Frank Lloyd Wright.

For this Capital Development Plan phase, DP and CMAR teams have provided external cost estimates from independent programming efforts. Independent cost estimates will continue to be provided by the DP and CMAR as the project progresses through the design process.

The CMAR will be at risk to provide the completed project within the agreed-upon Guaranteed Maximum Price (GMP). A final report on project control procedures,

such as change orders and contingency use, will be provided at project completion.

**Fiscal Impact and Financing Plan:**

The \$9 million project budget will be funded with gifts and other local funds.

**Debt Ratio Impact:** Not applicable.

The following table reflects charitable gift funding anticipated in the project plan of finance:

**Capital Project Information Summary**

**University:** Arizona State University

**Project Name:** Gammage Auditorium  
Rehabilitation

**Project Description and Location:**

This project will add new restroom facilities and add two new elevators in approximately 10,000 gross square feet of Gammage Auditorium.

**Project Schedule:**

Planning \$ August 17, 2015 (TD.00015) 7/27, 2012 (Tw(1Prs)(5)el)
