# FY 2018 Capital Development Plan University of Arizona

Revised November 2017

item Name:	Revised FY 2018 Capital Development Plan (UA)
	Action Item Committee Recommendation to Full Board First Read of Proposed Policy Change Information or Discussion Item
Issue: The	University of Arizona requests approval of the Revised FY 2018 Capital
Dev	velopment Plan (CDP) which includes two new major capital projects and four
•	viously approved projects. The Revised CDP total project budget is \$255.5
mill	ion.
Previous Bo	ard Action: FY 2018 Capital Development Plan June 2017
Enterprise o	r University Strategic Plan
	Empower Student Success and Learning Advance Educational Attainment within Arizona Create New Knowledge Impact Arizona Compliance Real Property Purchase/Sale/Lease Other:

#### Statutory/Policy Requirements:

- x Pursuant to Arizona Board of Regents Policy Chapter 7-107, each university shall submit an annual Capital Development Plan for the upcoming fiscal year in accordance with the calendar approved by the president of the Board.
- x Approval of the CDP allows universities to complete planning and design in preparation for submitting individual projects for Project Approval by the Business and Finance Committee, with a final report to the full Board.

#### Capital Development Plan Projects:

x The University of Arizona's Revised FY 2018 CDP totals \$255.5 million, proposes two new major capital projects for approval, and includes four previously approved capital projects.

Business & Finance Committee Meeting November 2, 2017 Item #8 Page 2 of 34

**EXECUTIVE SUMMARY** 

Page 3 of 34

#### **EXECUTIVE SUMMARY**

- x The operating and maintenance (O&M) cost associated with the Indoor Sports Center project is estimated to be \$313,000. The UA anticipates funding the O&M costs with Auxiliary funds. The remaining ICA project components listed above are renovations, therefore do not have additional O&M costs.
- x Debt Ratio Impact: Based on anticipated interest rates of 4.1 percent and approximately 25-year maturity for the Intercollegiate Athletics project, the estimated annual debt service on the SRBs will be approximately \$4.3 million. This will increase the University debt ratio by .10 percent excluding SPEED bonds and .10 percent if SPEED bonds are included. The projected highest debt ratio is 5.12 percent excluding SPEED bonds and 6.35 percent including SPEED bonds.

CDP Approved Projects (upcoming)						
	Approval Date	Approval Date Occupancy Project Cost Gift Target Current Gifts				
					(cash/pledges)	
College of Pharmacy, Skaggs Building Addition and Renovation	CDP June 2017	TBD	\$31.5M	\$10.0M	\$12.5M	
Student Success District	CDP June 2017	TBD	\$71.0M	\$20M(1)	\$3.75M	
Intercollegiate Athletics Project	CIP September 2017	TBD	\$67.5M	\$5M	\$5M	

<sup>(1)</sup> The approved Student Fee is sufficient to support the entire project cost, but as gifts are raised for the project, they will replace portions of the fee, which will allow the fee to go toward other needs.

#### Recommendation

The University of Arizona asks the committee to forward to the full board for approval of its Revised FY 2018 Capital Development Plan as presented in this Executive Summary.

cost, provides the contractor with design input and coordination throughout the project, improves potentially adversarial project environments, and allows for the selection of the most qualified contractor for this project. With the use of an independent cost estimate at each phase, and low-bid subcontractor pricing for the actual construction work, this method also provides a high level of cost and quality control.

x The CM@R provides a Guaranteed Maximum Price (GMP) based upon the amount previously set forth in the agreement. In the selection of major subcontractors, the CM@R uses a qualification-based selection process prescribed by the ABOR Procurement Code to allow these subcontractors a design-assist role during the design phase. All remaining subcontractor work is awarded on the basis of the lowest responsive and responsible subcontractor bids. For this work, a minimum of three subcontractor bids will be required, except for specialty items or instances where proprietary systems are required, such as for energy management systems and door locks. A final report on project control procedures will be provided at project completion.

#### Project Status and Schedule

- x This project was included in the FY 2019-2021 Capital Improvement Plan which was approved by the Board in September 2017. Planning commenced in September 2017 and construction is anticipated to begin in July 2018.
- x Project construction would be completed in July 2019.

#### **Project Cost**

x The total project budget is \$8 million with a construction cost of \$4.9 million

#### Fiscal Impact and Financing Plan

- **x** The Oro Valley Veterinarian Medical Program Improvement project totaling \$30 million is expected to be funded with land sale funds.
- **x** The Oro Valley Veterinarian Medical Program Improvement project is a renovation project and therefore do not have additional operations and maintenance (O&M) cost.
- **x** Debt Ratio Impact: This project will have no impact on debt ratios because the university will not issue debt to finance the project.

#### Occupancy Plan

x The 27,500 gross square feet UA Oro Valley facility will be renovated to provide the necessary programmatic areas to support student teaching, learning and hands-on experience. The technically specialized areas will include the following:

Anatomy Laboratory; Clinical Pathology and Microscopy Teaching Laboratory; Clinical Skills, Surgery and Dentistry Simulation Laboratories; Collaborative Learning, Communication and Professional Skills Area; Radiology and Imaging Area; Other Ancillary Support Areas.

## Arizona Board of Regents The University of Arizona Revised FY 2018 Capital Development Plan Project Justification Report

Hillenbrand Aquatic Center Improvements

#### **Previous Board Action**

x FY 2019-2021 Capital Improvement Plan

September 2017

#### Statutory/Policy Requirements

x Pursuant to Arizona Board of Regents Policy, Chapter 7-102 (B1), all capital projects with an estimated total project cost of \$5 million or more for renovation or infrastructure projects, or \$10 million or more for new construction or information technology shall be brought to the Business and Finance Committee for approval, regardless of funding source or financing.

#### Project Justification/Description/Scope

- x This is a life cycle replacement of the main swimming pool, the pump and chemical accessory rooms and either the addition of a conditioned electronic control room or the renovation of the existing control booth into conditioned space for scoreboard control. The new pool will be larger to accommodate various meet events occurring at the same time and include movable bulkheads to provide both long and short course options. The old dive pool will be demolished to create the space required for this larger pool.
- x The pool is structurally failing. The chemical room doesn't comply with current codes and safety standards. The maintenance cost is no longer sustainable. This new facility will support recruiting of student athletes and also provide a wide range of training options.

#### **Project Delivery Method and Process**

x This project is being delivered through a Design-Build (DB) delivery method. This approach was selected for this project because it can provide early cost control, saving time through fast-track project scheduling while still providing contractor design input and coordination throughout the project, improving potentially adversarial project environments and still allowing for the selection of the most qualified architect-contractor team for this project. With the use of an independent cost estimate at each phase, and low-bid subcontractor work for the actual construction, this method also provides a high level of cost and quality control.

## Arizona Board of Regents The University of Arizona Revised FY 2018 Capital Development Plan Project Justification Report

#### **Indoor Sports Center**

#### **Previous Board Action**

x FY 2019-2021 Capital Improvement Plan

September 2017

#### Statutory/Policy Requirements

x Pursuant to Arizona Board of Regents Policy, Chapter 7-102 (B1), all capital projects with an estimated total project cost of \$5 million or more for renovation or infrastructure projects, or \$10 million or more for new construction or information technology shall be brought to the Business and Finance Committee for approval, regardless of funding source or financing.

#### Project Justification/Description/Scope

- x A new 45,000 gsf building to provide safe, all-weather practice for football and other sports. A multi-use facility that is envisioned to benefit multiple sports which will also serve as a game day venue providing food, vendors, music, seating and other fan experience amenities.
- x Excessive heat and violent monsoon storms compromise the ability for practice to occur safely outdoors. The months of the greatest heat and storm intensity and frequency are coincidental with football practice. There is currently no indoor venue suited for large group, pre-game or post-game activities.

#### Project Delivery Method and Process

- x This project is being delivered through a Design-Build (DB) delivery method. This approach was selected for this project because it can provide early cost control, saving time through fast-track project scheduling while still providing contractor design input and coordination throughout the project, improving potentially adversarial project environments and still allowing for the selection of the most qualified architect-contractor team for this project. With the use of an independent cost estimate at each phase, and low-bid subcontractor work for the actual construction, this method also provides a high level of cost and quality control.
- x The Design-Builder provides a Guaranteed Maximum Price (GMP) based upon the amount previously agreed upon in the Design-Build agreement. The Design-Builder is at risk to provide the completed project within that price. In the selection of major

subcontractors, the Design-Builder uses a qualifications-based selection process prescribed by the ABOR Procurement Code to allow major subcontractors a design-assist role during the design phase. All remaining subcontractor work is awarded on the basis of the lowest responsive and responsible subcontractor bids. For this work, a minimum of three subcontractor bids will be required, except for specialty items or instances where proprietary systems are required, such as for energy management systems and door locks. A final report on project control procedures will be provided at project completion.

#### Project Status and Schedule

- **x** This project was included in the FY 2019-2021 Capital Improvement Plan which was approved by the Board in September 2017.
